

VIGILANT ENTITIES

Sovereign AI for capital allocators.

A multi-agent operating system for holdings, family offices, founders, and the investors who back them. Built on zero-leak architecture. Audited end-to-end. White-labelled for your brand.

PRODUCT BROCHURE · JULY 2026

01 · MANIFESTO

Capital deserves better tools.

Capital allocators today run on tools designed for someone else. Generic CRMs that leak portfolio data to vendors. Spreadsheets that lose context between quarters. AI assistants that ship every founder secret straight to OpenAI's training corpus.

Vigilant Entities is the antidote. A multi-tenant operating system where every keystroke, every redaction, every audit log stays inside infrastructure **you control**. Where AI works for you, not on you. And where the boardroom artefacts — DD packets, milestone evidence, council deliberations, investor briefings — are generated, signed, and version-locked in seconds.

This brochure walks you through what we do, who it's for, and why it matters. Read it cover-to-cover (~12 minutes) or skip straight to the section that matches your seat at the table.

01 SOVEREIGNTY

Zero-leak architecture.

Every LLM call routes through your AWS Bedrock account. No vendor sees your data. Universal redaction pre-flight. Audit hash on every prompt.

02 MULTI-AGENT AI

Six personas. One mission.

Shu'aib (mentor), Wujdān (emotion), Yusuf (narrative), Iqra (research), Harun (security), Māsa (ops). They debate before they decide.

03 WHITE-LABEL

Your brand. Their trust.

Maker-controlled tenancy. Holding admins get a fully-branded experience — logo, palette, domain — without touching code.

02 · ARCHITECTURE

Zero-leak by design. Audited end-to-end.

Most SaaS platforms send your data to OpenAI, Anthropic, or Google the moment you hit Enter. We don't. Every AI call in Vigilant Entities is gated by a four-stage pipeline that guarantees your portfolio stays inside infrastructure you own.

STAGE	WHAT HAPPENS	WHAT LEAVES YOUR PERIMETER
01 Capture	User keystroke / file upload / form post.	Nothing.
02 Redact	Universal redaction engine masks names, IDs, secrets.	Nothing.
03 Process	AI call routed via your AWS Bedrock account (or local LLM).	Redacted tokens only.
04 Audit	Every prompt + response sha-256 hashed, written to your S3.	Nothing.

The Omniscient Orbital Harmony (OOH) patent. Our novel redaction-and-rehydration scheme strips identifying tokens before any external model touches them, then rehydrates the response server-side. Pending USPTO #18/XXX-XXX.

03 · MULTI-AGENT AI

Six personas. One mission.

Where competitors ship a single all-purpose chatbot, Vigilant Entities ships six purpose-built personas. They debate before they decide — surfacing dissent in the AI Council before the Maker even reads the synthesis.

SHU'AIB

The Mentor

Veteran operator persona. Coaches founders through hard pivots, surfaces patterns from 1000+ comparable journeys, calls out blind spots before they cost runway.

WUJDIN

The Empath

Emotional-intelligence layer for founder check-ins. Detects burnout signals from journal entries, recommends sponsor escalations before things break.

YUSUF

The Narrator

Monday Brief author — synthesises 168 hours of platform activity into a 90-second narrative your Maker can read on the way to the boardroom.

IQRA

The Researcher

Reads, indexes, and answers questions about every founder's memo / pitch / journal. Pulls citation-grade quotes in 2 seconds.

HARUN

The Guardian

Security scanner. Scans every file upload, redacts sensitive tokens, raises geo-anomaly alerts when an account signs in from an unexpected country.

MUSA

The Operator

Orchestrator. Routes every council session, schedules digest fanouts, triggers the OOH redaction pipeline. The conductor behind every other persona.

04 · USE CASES

Three audiences. One platform.

FOR HOLDINGS & FAMILY OFFICES**Run every portfolio company like a brigade.**

- Multi-tenant white-label — every holding gets its own sub-domain, palette, logo.
- Maker controls — system_admin can impersonate any role for audit without password.
- Entity Roadmap-to-Evidence — milestones auto-draft via AI, save as permanent artefacts.
- Investor DD packets — branded boardroom PDFs in two clicks, magic-link share + view tracking.
- Sovereignty Stream — live feed of every AI call across your portfolio.

FOR FOUNDERS**Cockpit-grade tooling. No CFO bloat.**

- Founder Cockpit — your week, your runway, your milestones, your mentor's nudges.
- AI Toolkit per milestone — draft lean-canvas / GTM / fundability brief in 4 seconds.
- Saved as evidence — every accepted draft becomes a permanent artefact under your entity.
- AI Council Session — convene Shu'aib + Wujd■n + Yusuf to debate your next move.
- Investor share — generate a DD packet + magic link in two clicks. Every view logged.

FOR INVESTORS / LPs**Reading deck → reading evidence.**

- Branded DD packets — every cleared milestone visible as a signed artefact.
- Magic-link share — view on phone, no signup, audit-logged.
- Trust Center — public 90-day uptime, OOH patent, audit-chain hash.
- Network Canvas — see how every founder, mentor, and investor connects.
- Council transcript export — see the full deliberation, not just the synthesis.

05 · MODULE SHOWCASE

Twelve modules. Zero swivel-chair.

Every module is built native to the platform — no Zapier glue, no third-party iFrames. One identity, one audit chain, one place every artefact lives.

FOUNDER Founder Cockpit Personal dashboard, runway, milestones, journal, mentor nudges.	ROADMAP Roadmap-to-Evidence AI auto-drafts milestone artefacts. Auto-tick. Audit chain.	AI COUNCIL AI Council Session 6 personas, branching deliberation, dissent panel, signed transcript.
DD PACKET Investor DD Packet Boardroom PDF + magic-link share + view tracking + SMTP delivery.	SHURA NEXUS Network Canvas Force-directed graph of every founder ■ mentor ■ investor edge.	ERM Enterprise Risk Severity tiers, categories, AI risk surfacing, board-pack export.
TRUST CENTER Trust Center Public uptime, OOH patent, audit hash, sovereignty claims.	DOCS HUB Documents Hub Every file, every version, OCR-indexed, AI-searchable.	MENTORS AI Mentors Shu'aib-grade coaching with 1000+ founder-pattern memory.
APPROVALS Approval Workflows Custom form designer, multi-step approval, audit-stamped.	AGREEMENTS Agreements & Cap Table Founder vest, SAFE, equity, advisor schedules — all in one place.	SECURITY Brute-force + Geo Alerts Per-IP throttle, country-anomaly notifications, trusted devices.

06 · TRUST & AUDIT

Show your work. Prove it on demand.

Every claim on the platform is backed by a publicly verifiable artefact. Click the badge, see the proof. No marketing fluff.

CLAIM	EVIDENCE	WHERE
Zero-leak architecture	Universal redaction code + OOH patent brief	Trust Center · /trust
Audit chain integrity	SHA-256 hash of every audit event, public verifier	Trust Center · /trust/audit
AI sovereignty	All AI calls routed via tenant AWS Bedrock account	Tenant Settings · AWS
Uptime	90-day green-state strip, third-party monitored	Trust Center · /trust/uptime
Patent IP	Omniscient Orbital Harmony · USPTO filed	Trust Center · /trust/ooh

For the legal-review pile: we are SOC-2 Type II in preparation, GDPR-aligned by design (Article 25 — privacy by default), and compatible with QFC / DIFC sovereign-data residency mandates. The OOH redaction pipeline ensures cross-border AI calls never carry identifying tokens.

07 · NEXT STEP

Where capital goes to be sovereign.

There are two ways from here:

01 · BOOK A DEMO

30 minutes. Your boardroom. Our screen-share.

Email Admin@vigilantentities.com with subject 'Demo · <your-fund>'. We respond within 24h.

02 · TRY THE SANDBOX

A live tenant seeded with a 12-startup portfolio.

Visit vigilantentities.com and request access. We approve within hours. No credit card required.

We move fast. From first email to white-labelled tenant: **10 business days**. From first founder onboarded to boardroom-ready DD packet: **~6 weeks**. Every metric in this brochure is auditable on request.
